

## Turkish Economy - Main Indicators & Expectations 20.01.2025

As of the date of our Report on the current situation and future expectations of the Turkish economy, some of the latest basic data compiled from Turkish Statistical Institute and CB sources are as shown in the Table below.

In the table, in the main indicators section, the color of the cell containing the last announced data corresponds to the positive or negative change of the last announced data (green is positive, red is negative).

Economic confidence index can take values in the range of 0-200. An economic confidence index greater than 100 indicates optimism regarding the general economic situation, while an index less than 100 indicates pessimism regarding the general economic situation.

| MACROECONOMIC INDICATORS & EXPECTATIONS        |                      |              |               |                 |         |         |               |         |        |               |              |         |               |        |        |        |
